QUESTION 12

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Server 2019 organization that contains 200 mailboxes.

You need to add a second email address to each mailbox. The address must have a syntax that uses the first letter of each user\'s last name, followed by the user\'s first name, and then @fabrikam.com.

Solution: You convert all the mailboxes to shared mailboxes, and then you run the Set-Mailbox cmdlet and specify the -EmailAddressPolicyEnabled $true parameter.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

Email address policies define the rules that create email addresses for recipients in your Exchange organization. The basic components of an email address policy are:

1.

 Email address templates: Define the email address format for the recipients (for example @contoso.com or .@contoso.com).

2.

 Recipient filter: Specifies the recipients whose email addresses are configured by the policy.

3.

Priority: Specifies the order to apply the email address policies (important if a recipient is identified by more than one policy). The EmailAddressPolicyEnabled parameter specifies whether to apply email address policies to this recipient. Valid values are:

1.

$true: Email address policies are applied to this recipient. This is the default value.

2.

$false: Email address policies aren\\'t applied to this recipient.
