QUESTION 3

DRAG DROP

Your company has a Microsoft Exchange Online subscription for an email domain named contoso.com.

The company works with a partner company that uses an email domain named tailspintoys.com.

You need to configure the environment only to accept email from tailspintoys.com if the email is sent from an IP address of 131.107.12.85.

How should you configure the connector from the Exchange admin center? To answer, drag the appropriate options to the correct message settings. Each option may be used once, more than once, or not at all. You may need to drag the split

bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Name	SMTP domain	Email platform
Fabrikam, Inc.	Fabrikam.com	On-premises Exchange Server 2019
Contoso, Ltd.	Contoso.com	Third-party email server
Litware, Inc.	Litware.com	Exchange Online

Correct Answer:

Answer Area

Statements	Yes	No
For User1 to share contacts with the users at Fabrikam, a federation trust is required.	○	○
User2 can share free/busy hours, subject, and location with the users at Contoso.	○	○
User3 can share calendars with the users at Litware.	○	○

QUESTION 4

You have a Microsoft Exchange Online tenant that has Office 365 Advanced Threat Protection (ATP) enabled.

The tenant contains a user named Ben Smith who has a UPN of ben.smith@fabrikam.com. Ben Smith is protected by using an ATP anti-phishing policy.

Ben Smith reports that emails sent from his personal account of ben.smith@relecloud.com are not delivered to his work email account.

You need to ensure that personal emails are delivered to the ben.smith@fabrikam.com

What should you do?

A. Create a transport rule to assign the MS-Exchange-Organization-PhishThresholdLevel header a value of 2 for the message received from ben.smith@relecloud.com

B. Add ben.smith@fabrikam.com as a trusted sender to the ATP anti-phishing policy.

C. Add ben.smith@relecloud.com as a trusted sender to the ATP anti phishing.

D. Add relecloud.com to the ATP anti-phishing list of misted domains.

Correct Answer: C

policies?view=o365-worldwide

QUESTION 5

You have a hybrid deployment between a Microsoft Exchange Online tenant and an on-premises Exchange Server 2019 organization.

In Exchange Online, you create a shared mailbox named Mailbox1.

Users report that they cannot open Mailbox1 in Microsoft Outlook.

You discover that there is no entry in the address list for Mailbox 1 in the Exchange Server organization.

You need to create Mailbox1 on-premises and enable the mailbox for hybrid management

Which PowerShell cmdlet should you run?

A. Set-OnPremisesOrganization with the -OrganizationRelationship parameter

B. Enable-Remotemailbox with the -Shared parameter

C. New-Remotemailbox with the -Shared parameter

D. Upgrade-HybridConfiguration with the -ForceUpgrade parameter

Correct Answer: C

Cause These issues can occur if the shared mailbox is created by using the Exchange Online management tools. In this situation, the on-premises Exchange environment has no object to reference for the shared mailbox. Therefore, all queries for that SMTP address fail.

Solution

For on-premises environments that use Exchange Server 2013 (CU21 or later versions) or Exchange Server 2016 (CU10 or later versions), do the following:

Create an on-premises object for the cloud mailbox by using the New-RemoteMailbox cmdlet with the -Shared switch in Exchange Management Shell.

This object must have the same name, alias, and user principal name (UPN) as the cloud mailbox. For more information, see New-RemoteMailbox.

For example, run the following command:

PowerShell

New-Remotemailbox -Name "" -Alias -UserPrincipalName -Remoteroutingaddress -Shared

QUESTION 6

You have a Microsoft Exchange Online tenant.

You plan to place a hold on all email messages stored in the mailbox of a user named User1.

What should you create first?

A. an eDiscovery case

B. sensitive info type

C. a data loss prevention (DLP) policy

D. an information barrier segment

Correct Answer: A

You can use an eDiscovery case to create and manage eDiscovery holds that can be applied to user mailboxes and other content locations in Microsoft Purview1. You can also use an eDiscovery case to search for and export content from

mailboxes and other locations1.

An eDiscovery case is different from a Litigation Hold, which is a hold that is applied to user mailboxes in Exchange Online1. A Litigation Hold isn\\'t identified by a GUID1. A sensitive info type is a predefined or custom entity that can be used to

identify and protect sensitive data in Microsoft Purview2. It is not related to placing a hold on email messages.

A data loss prevention (DLP) policy is a policy that helps prevent the accidental or intentional sharing of sensitive information outside your organization2. It is not related to placing a hold on email messages.

An information barrier segment is a group of users who are allowed or blocked from communicating with each other in Microsoft Teams or SharePoint Online2. It is not related to placing a hold on email messages.
