QUESTION 1

You are developing a new car audio system kit. The kit configuration has restrictions based on car model, speaker size, and other expression constraints.

You need to set up a new item for the car audio system.

How should you create the new product? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

New released product field

Product subtype

Product dimension group (active dimensions)

Configuration technology

Selection

item
service
product
product master

configuration
style
style and configuration
size and style

predefined variant
dimension-based configuration
constraint-based configuration

Correct Answer:

Answer Area

New released product field

Product subtype

Selection

item
service
product
product master

Product dimension group (active dimensions)

configuration
style
style and configuration
size and style

Configuration technology

predefined variant
dimension-based configuration
constraint-based configuration

QUESTION 2

A company that produces rubber hose using Discreet orders accounts for raw material scrap after report as finished though inventory movement journals.

The company has noticed that most of the scrap that is recorded is due to start up that feeds the hose to the finishing process. In addition, the amount of scrap that is recorded is consistent regardless of the amount of hose being produced.

You need to account for material lost during startup.

What should you do?

- A. Do a case study for the scrap items and enter the average amount of scrap as a separate line items on the Bill of materials.
- B. Enter the amount of scrap that is consumed as constant scrap in the Bill of materials.
- C. Enter the amount of scrap that is consumed as variable scrap in the Bill of materials.
- D. Enter the consumption amount on the line to match the actual amount used.

Correct Answer: B

QUESTION 3

A paint manufacturer is using Process manufacturing. The manufacturer has a quality error. Batches of paint that use the wrong formula have been marked for rework.

The production planner reports they cannot schedule the batch order even though the order has been estimated.

You need to add reservations to the items to be used for the rework order.

What should you do?

- A. Reserve the inventory in the formula
- B. Reset the batch order and delete the formula items. Re-enter the formula items
- C. Add by-products that need to be used and then re-estimate
- D. Add co-products that need to be used and then re-estimate

Correct Answer: A

QUESTION 4

You have updated a cost category price from \$5.00 to \$7.00. You process a production order which uses the cost category. After ending the order, you realize a new standard cost was not calculated after the price update. You need to validate how this impacted the financial voucher transactions. What transaction would you see in the general ledger?

- A. \$2.00 debit to the production price variance account
- B. \$2.00 credit to the production price variance account
- C. \$2.00 debit to the production quantity variance account
- D. \$2.00 credit to the lot size variance account

Correct Answer: B

QUESTION 5

A company implements Dynamics 365 for Finance and Operations.

Production orders are generated for products directly from projects. You create the following production order:

Create production order

IDENTIFICATION	GROUPINGS
Production 000006	Pool
BOM	
Name BOM1	SETUP
INVENTORY DIMENSIONS	Ledger Item and resource
Site MainOffice	Reservation Manual
Warehouse MainOffice	Release to warehouse Allow partial reservation
PRODUCTION	PROJECT
Type Standard	Project ID 00000224
Quantity 50.00	Activity number
Delivery 4/12/2019	Posting method Finished item
Time 10:00 AM	FINISHED ITEM
BOM/ROUTE	Category ProjItem
BOM date 4/12/2019	Line property Billable
BOM number BOM500	Sales currency USD
Route number	Unit ea

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Hot Area:

When will costs for product components and labor be recognized against the project?

▼
Item transactions are created when the production order is ended.
Item transactions are created when the production order is started.
Item transactions are created at each step in the production process.

The company is using standard cost for several of its components used in production. What should you change in the production order?

▼
Change the Posting method to Consumed.
Change the Reservation to Automatic.
Change the Category to use Subcontract.

Correct Answer:

When will costs for product components and labor be recognized against the project?

▼
Item transactions are created when the production order is ended.
Item transactions are created when the production order is started.
Item transactions are created at each step in the production process.

The company is using standard cost for several of its components used in production. What should you change in the production order?

▼
Change the Posting method to Consumed.
Change the Reservation to Automatic.
Change the Category to use Subcontract.

QUESTION 6

A process manufacturing company is implementing rebates in Dynamics 365 for Finance and Operations for some of their customers on specific items.

You are the production consultant in charge of implementing the processes needed for calculating and applying the rebates for the subset of customers and items.

You need to implement the order of transactions to process the rebates.

In which order should the actions be performed? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

cumulate rebates	
process rebates	
process sales invoicing	
generate rebates	
approve rebates	

Correct Answer:

	process rebates
	generate rebates
	cumulate rebates
	approve rebates
	process sales invoicing

Reference: <https://docs.microsoft.com/en-us/dynamics365/supply-chain/sales-marketing/tasks/processcustomer-rebates>

QUESTION 7

A company produces homeopathic lotions for pain relief. The lotions use a combination of ProductA and ProductB. ProductA is the primary ingredient. You use ProductB to adjust the concentration of active ingredients in the lotion.

You need to ensure that the lotion final product has a consistent concentration of anti-inflammatory agents.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Set the formula line type of ProductB to Active.
- B. Set the formula line type of ProductA to Active.
- C. Set the formula line type of ProductB to Compensating.
- D. Set the formula line type of ProductA to Compensating.
- E. Set the formula line type of ProductC to None.

Correct Answer: BC

Reference: <https://docs.microsoft.com/en-us/dynamics365/supply-chain/production-control/batch-balancing>

QUESTION 8

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some questions sets might have more than one correct solutions,

while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 for Finance and Operations for their Lean manufacturing environment.

There has been an engineering change to a fixed quantity product that is in production. This change will add an additional processing step as the second step. The existing version must be phased out and replaced by the new version.

You need to ensure that the engineering change takes affect at the end of the month.

Solution: 1.) Edit the existing step number two activity to be the new engineering process 2.) Edit the existing production flow. Set the expiration date due to the end of the month 3.) Edit the existing Kanban rule. Set the expiration date to the end of the month 4.) Activate the production flow

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 9

A pharmaceutical manufacturer uses Process manufacturing.

You are consolidating planned batch orders for a specific medication. The order must cover two weeks of demand. No other items need to be consolidated.

You need to change the coverage group of the items.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order

Select and Place:

Actions

- Change the general coverage group in the master planning parameters to the newly defined coverage group.
- Edit the coverage period on the current coverage group on the medication.
- Apply the new coverage group to the medication.
- Delete the old coverage group from the coverage group table.
- Rerun the plan.
- Create a new item number fo the medication.
- Create a new coverage group.
- Define the coverage period as the equivalent of two weeks in days.

Answer Area

Correct Answer:

Actions

- Change the general coverage group in the master planning parameters to the newly defined coverage group.
- Edit the coverage period on the current coverage group on the medication.
-
- Delete the old coverage group from the coverage group table.
-
- Create a new item number fo the medication.
-
-

Answer Area

Create a new coverage group.

Define the coverage period as the equivalent of two weeks in days.

Apply the new coverage group to the medication.

Rerun the plan.

QUESTION 10

SIMULATION

You are a functional consultant for Contoso Entertainment System USA (USMF).

You need to assign a cost of 1,000 US dollars to the night shift.

To complete this task, sign in to Dynamics 365 portal. You must complete Task 1 before completing this task. Task 1 is the creation of a new cost category named NightShift for the night shift.

Correct Answer:

You need to configure a cost group with the type set to 'Direct Manufacturing'

QUESTION 11

A company manufactures high-end speaker systems. You have different configurations available for customers to customize features including finishes and speaker materials. You have a product configuration model with bill of material lines and conditions for each component.

A customer can optionally add on protective covers, but only if a non-metal material is selected. If any other material is selected, the covers cannot be added. You add the following attributes:

Attribute	Attribute values
Speaker material	Metal, Polymer, Cloth
Corner protection	Yes, No

You need to create an expression-based constraint that will only allow Corner Protection if Metal is not selected. How should you complete the expression? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Implies [SpeakerMaterial == "Metal", != "Cloth", < "Polymer", > "CornerProtection"]

Correct Answer:

Answer Area

Implies [SpeakerMaterial != "Metal", = "Cloth", < "Polymer", > "CornerProtection"]

QUESTION 12

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains

a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A manufacturing plant uses Lean processes. You plan to outsource a painting operation to a subcontracting vendor. You create a service item named SP-01 to represent the painting service.

You need to create a subcontracting activity for the painting service.

Solution:

1.

Create a vendor resource and work cell for outsourced painting; add the vendor resource to the work cell.

2.

Create a production flow process activity using the painting work cell and the service item for picking.

3.

When the service is required, create a purchase order to the subcontracting vendor and add a line for the service item and the vendor price. Does the solution meet the goal?

A. Yes

B. No

Correct Answer: A

References: <https://docs.microsoft.com/en-us/dynamics365/unified-operations/supply-chain/production-control/activity-based-subcontracting>

QUESTION 13

A company that uses discreet manufacturing concepts to produce solar panels has a temporary change of glass supplier. The substitute glass will only be used for three months. The company also uses Bill of materials (BOM) version to track

changes of the raw materials.

Managers are manually adjusting the production picking lists to reflect the alternate glass that is being temporarily used. The time spent doing manual adjustments to production picking lists has become a burden.

You need to create a new BOM with the alternate glass and include a from and to date on the BOM version.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Edit the current route to reflect the substitute material.	
Create a new BOM and BOM version that includes the temporary glass substitute.	
Activate the BOM version that does not include the substitute glass.	
Activate and approve the new BOM version.	
Set up an alternative item number on the release product.	
Add from and to dates to the current and alternate BOM versions that reflect the time period that the new BOM version will be used.	

Correct Answer:

Edit the current route to reflect the substitute material.	Create a new BOM and BOM version that includes the temporary glass substitute.
	Add from and to dates to the current and alternate BOM versions that reflect the time period that the new BOM version will be used.
Activate the BOM version that does not include the substitute glass.	Activate and approve the new BOM version.
Set up an alternative item number on the release product.
