### QUESTION 1

Match the HTML5 input attributes to the corresponding descriptions. (To answer, drag the appropriate attribute from the column on the left to its description on the right. Each attribute may be used once, more than once, or not at all. Each correct match is worth one point.)

Select and Place:

Attribute	Description
maxlength	<input type="text"/> provides a way to set a regular expression that the value must match
multiple	<input type="text"/> provides a way to set default text until focus is placed in an element
pattern	<input type="text"/> provides a way to set form elements as mandatory
placeholder	<input type="text"/> provides a way to allow more than one file email address in a single input
required	

Correct Answer:

Attribute	Description
maxlength	<input type="text"/> pattern provides a way to set a regular expression that the value must match
<input type="text"/>	<input type="text"/> placeholder provides a way to set default text until focus is placed in an element
<input type="text"/>	<input type="text"/> required provides a way to set form elements as mandatory
<input type="text"/>	<input type="text"/> multiple provides a way to allow more than one file email address in a single input
<input type="text"/>

- A.
- B.
- C.
- D.

Correct Answer: C

## QUESTION 3

You work as a senior developer at ABC.com. The ABC.com network consists of a single domain named ABC.com. ABC.com makes use of HTML5 and CSS3 in their development process.

You are running a training exercise for junior developers. You are currently discussing an object of the Web Storage specification that is designed for scenarios where the user is carrying out a single transaction.

Which of the following is the object being discussed?

- A. foreignStorage
- B. externalStorage
- C. localStorage
- D. sessionStorage

Correct Answer: D

## QUESTION 4

Your HTML5 code includes this code segment:

```
<form action="#">  
<p>What flavor do you prefer? </p>  
<input type="radio" name="flavor" id="vanilla" />Vanilla<br />  
<input type="radio" name="flavor" id="butterscotch" />Butterscotch<br />  
<input type="radio" name="flavor" id="chocolate" />Chocolate<br />  
</form>
```

Which JavaScript code fragment will determine that a visitor has selected the "Chocolate" radio button?

- A. `if (document.getElementById("chocolate").checked == true)`
- B. `if (document.getElementById("chocolate").value = true)`
- C. `if (document.getElementById("chocolate").checked = true)`
- D. `if (document.getElementById("chocolate").value == true)`

- A. Option A
- B. Option B
- C. Option C
- D. Option D

Correct Answer: A

You work as a senior developer at ABC.com. The ABC.com network consists of a single domain named ABC.com.

You are running a training exercise for junior developers. You are currently discussing an HTML5 attribute that identifies the cursor position when accessing a form initially.

Which of the following is the attribute being discussed?

- A. The autofocus attribute.
- B. The focusOffset attribute.
- C. The focusNode attribute.
- D. The autocomplete attribute.
- E. The hideFocus attribute.

Correct Answer: A

---

#### QUESTION 12

Match the HTML5 elements to the corresponding functions. (To answer, drag the appropriate HTML5 element from the column on the left to its function on the right. Each HTML5 element may be used once, more than once, or not at all. Each correct match is worth one point.)

Select and Place:

HTML5 Element	Function
COLGROUP	groups the header content in a table
FIELDSET	defines a header cell in a table
OPTGROUP	defines a group of related options in a drop-down list
TH	defines a group of related elements in a form
THEAD	specifies a group of one or more columns in a table for formatting

Correct Answer:

HTML5 Element	Function
THEAD	groups the header content in a table
TH	defines a header cell in a table
OPTGROUP	defines a group of related options in a drop-down list
FIELDSET	groups related elements in a form
COLGROUP	specifies a group of one or more columns in a table for formatting

### QUESTION 13
